Re: Ex Parte Notice,

Jurisdictional Separations Reform, CC Docket

No. 80-286

Dear Ms. Salas:

Yesterday, a copy of the attached was delivered to Gary Seigel, Branch Chief, Accounting Safeguards Division, containing previous filings made by NECA and by state members of the the Joint Board. In accordance with Commission Rules, I am submitting two copies of this notice. Kindly stamp the additional return copy provided. Please direct any questions regarding this filing to me.

Sincerely,

Gina Harrison Attachments

> Re: Notice of Ex Parte Meeting, Jurisdictional Separations Reform, CC Docket No. 80-286

Dear Ms. Salas:

The attached letter to Dorothy Attwood, Esq., Legal Advisor to Chairman Kennard, was delivered today, detailing the basis of the NECA study which found that 18% of 1998 local/intrastate dial equipment minutes represent Internet traffic. Treating this jurisdictionally interstate traffic as intrastate for separations purposes produces a \$170 million misallocation of costs to the state jurisdiction for NECA pool members.

In accordance with Commission Rules, I am submitting two copies of this notice. Kindly stamp the additional return copy provided. Please direct any questions regarding this filing to me.

Sincerely,

> Re: CC Docket No. 80-286, In the Matter Of Jurisdictional Separations Reform and Referral to the Federal-State Joint Board.

## Dear Ms. Attwood:

Thank you for meeting with us on October 7 to discuss the need for an interim separations freeze. Rural telephone companies urgently need relief from the substantial jurisdictional cost shifts caused by treating interstate internet traffic as local. As promised, I am providing you with more information on the study described in NECA's October 5<sup>th</sup> letter to Common Carrier Bureau Chief Larry Strickling.

I am attaching a copy of the data request NECA sent to 551 study areas in the NECA traffic sensitive pool. All of these companies perform cost studies themselves or through their consultants; NECA did not include average schedule companies in the data request.

The results described in the Strickling letter were based on individual responses from 155 study areas and summary data provided by consultants for an additional 254 companies. On average, companies and consultants reported that 18 percent of local /intrastate dial equipment minutes was internet traffic. Approximately 25 percent of the respondents gathered data using some type of actual measurement over various time periods. Approximately 50 percent used information provided by information service providers, many of which are affiliated with the telephone company. The remainder used estimating techniques.

Pending ultimate resolution of issues, immediate imposition of an interim separations freeze will alleviate the troubling uncertainty surrounding cost recovery at a time when rural telephone companies are striving to meet growing customer demand for access to information providers.

If you have additional questions and would like to discuss this matter further please contact me at the above referenced telephone number.

Very truly yours,

# NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. 1999 INTERNET USAGE DATA REQUEST

Plea	se enter the following information.							
a)	Study area code							
b)	1998 Local Dial Equipment Minutes (DEM)							
c)	1998 State toll DEM							
d)	1998 Interstate DEM							
e)	Amount of Internet usage included in (b) or (c) above (i.e., would be moved to Interstate)							
Ð	If actual Internet usage is not available, what is the estimated percent of total intrastate DEM [(b)+(c)] that is Internet?							
g)	Estimated 1999 Annual Percent Growth in Internet Usage							
h)	Method used to determine Internet usage in (e):							
·	Name of Person completing this form:							
	Phone Number:							
	E-mail address:							

Please submit completed form(s) to NECA by July 16, 1999 using one of the following methods:

- 1) Submit on-line:
  - Go to the NECA Data Request Entry website at http://necainfo.org
  - Select the "Internet Usage Data Request" hyperlink to go to our secure site
  - Enter userid "internet07" and password "m7936" (note: userid and password are case-sensitive and must be entered as lower case)
  - Enter the data as requested and press "SUBMIT"
  - If applicable, enter data for your next study area.
- 2) Submit via e-mail:
  - Prepare spreadsheet (Lotus 1-2-3 Release 5 or Microsoft Excel 97, or lower releases) replicating the data request form
  - For multiple study areas, enter each study area's data as a separate column on the spreadsheet.
  - E-mail completed spreadsheet to: apusate@neca.org
- 3) Fax completed form to your NECA region office.

## IF YOU ARE UNABLE TO PROVIDE THE REQUESTED DATA:

- 1) Enter study area code [line (a)] and contact information (name, phone number) on this form.
- 2) Indicate on line (h) that you cannot provide this data.
- 3) Fax this form to your NECA region office no later than June 25, 1999.

# NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. 1999 INTERNET USAGE DATA REQUEST

## Instructions/Assumptions:

- 1) Please submit one form per study area. Do <u>not aggregate</u> study area data to holding company level.
- 2) DEM usage data submitted should correspond to data that would be (or has been) used to develop 1998 traffic factors. For example, if you have been reflecting Internet usage as local DEM, continue to include it in line (b) data as well as reflect it on line (e).
- 3) Do not reflect any Internet usage on line (e) that may have been already included in Interstate DEM on line (d) -e.g., Internet traffic utilizing interstate 800/888/877 service.
- 4) Estimated percent growth in Internet usage from 1998 to 1999 on line (g) should reflect any actual 1999 usage available, as well as realistic projections for the remainder of 1999.
- 5) Examples of methods used to determine Internet usage on line (h) could include: actual measurement, holding time studies, estimates provided from Internet providers.

Voice: 973-884-8350 Fax: 973-884-8008 E-mail: raskoff@neca.org

Mr. Lawrence E. Strickling Chief, Common C. rier Bureau Federal Communications Commission 445 12th Street, S.W. Washington, D.C. 20554

Dear Mr. Strickling:

New information has come to light which adds urgency to the recent request of the state members of the Joint Board on Separations for an en banc meeting to deal with Internet related issues. Since filing a letter in support of the state member's request, NECA has completed a comprehensive survey of rural local telephone companies to determine the extent of Internet traffic. The results detailed below make a compelling case for an interim separations freeze as soon as possible. NECA asks the Commission to adopt an interim separations freeze quickly based on the record before the Commission.

NECA projects, based on results of a recent data request to its member companies, that approximately 18% of 1998 local/intrastate dial equipment minutes represent Internet traffic. Treating this jurisdictionally interstate traffic as intrastate for separations purposes produces a \$170 million misallocation of costs to the state jurisdiction for NECA pool members. Local ratepayers are unlikely to accept rate increases to recover these costs which are related to interstate traffic.

Further, the tremendous growth of Internet traffic can create network congestion that impairs service levels to subscribers absent significant investments in network facilities. Rural local exchange carriers, however, are caught in regulatory uncertainty surrounding the cost recovery for Internet traffic. Continuation of the status quo places carriers in the untenable position of having to make investments with unknown cost recovery.

Pending ultimate resolution of the difficult rate and cost recovery issues surrounding Internet traffic, it is essential that the proposed en banc meeting be convened quickly and an interim separations freeze, based on a representative historical period, be put into effect immediately.

Very truly yours,

hard A. Arboff som

# Federal State Joint Board On Separations

October 27, 1999

The Honorable William Kennard

Chairman

Federal Communications Commission

445 12th Street, SW

Washington, DC 20554

RE: State Member Request For the FCC To Notice and Solicit Comment on Cost Study Analysis Tool - Filed in proceeding captioned -In the Matter of Jurisdictional Separations Reform and Referral to the Federal- State Joint Board, CC Docket No. 80-286

The State Members of the Federal State Joint Board on Separations - Oregon Commissioner Joan Smith, Maine Commissioner Thomas Welch, and Iowa Commissioner Diane Munns - believe that the cost study analysis tool described in the attached document can assist the Joint Board in evaluating the financial effects of various options and issues to be addressed in the ongoing comprehensive review of the Part 36 rules.

The attachment conveys the State Member's formal request for the FCC to solicit comments on the usefulness of this tool as soon as possible.

I have attached a disk with the model included to this transmittal. Copies of the cost study analysis tool will also be posted with the attached State Member memorandum to the National Association of Regulatory Utility Commissioner's webpage at http://www.naruc.org.

Thank you for your attention to this request.

Sincerely,

J.Bradford Ramsay

# Formal Request from State Members

### For Notice and Comment on

## Separations Simulation Cost Study Tool

#### Introduction

The FCC issued a Notice of Proposed Rulemaking (NPRM) in <u>Jurisdictional Separations Reform and Referral to the Federal-State Joint Board</u>, CC Docket 30-286 on October 7, 1997 (FCC 97-354). The goal of the NPRM was a comprehensive review of the Part 36 separations rules to consider changes that may need to be made in light of changes in the telecommunications industry. The proposals set forth in the NPRM were referred to the Federal-State Joint Board established in CC Docket 80-286 (Separations Joint Board) for preparation of a recommended decision. On December 21, 1998, the State Members of the Separations Joint Board filed a state report on Comprehensive Review of Separations setting forth additional issues to be addressed by the Joint Board. Interested parties filed comments and replies on the NPRM and the state report.

The Separations Joint Board is reviewing and deliberating the various proposals, recommendations and tentative conclusions contained in the NPRM, the State Report and parties' comments. In crafting any recommended decision or proposals for a Further NPRM, the Separations Joint Board may need to estimate any cost shifts that could result from different separations approaches. To this end, the State Members of the Separations Joint Board propose using a simulation cost study tool developed in Excel and used successfully by the Public Utility Commission of Oregon in various adjudicatory proceedings before the commission since 1985. This cost study tool would assist the Joint Board in evaluating the cost shift effects of proposed separation rule changes on Incumbent Local Exchange Carriers (ILECs) subject to 47 C.F.R. Part 36 rules.

The cost study tool applies the current Part 36 rules to an ILEC's ARMIS 43-04 information. The study develops a base case interstate and intrastate revenue requirement using company-specific information. An input sheet is included which allows the user to change various traffic factors, plant categorizations, tax rates and ROR. Adjusted interstate and intrastate revenue requirements and resultant cost shifts associated with the changes are calculated.

To demonstrate its possible use, we estimated the theoretically possible effects of two recent FCC decisions, the reciprocal compensation order and the order on the GTE ADSL tariff filing. The estimated results presented here, of course, depend upon assumptions that are explained below.

The State Members believe that the Excel cost study tool provides the Joint Board with the flexibility not available with other tools used to evaluate financial effects of changes to separations rules. The State Members also believe that state regulators and other parties affected by changes to jurisdictional cost separations will find the cost study tool helpful in evaluating how such changes could affect them as they estimate rate impacts.

## Internet Dial-up Access Services

The FCC, in its reciprocal compensation order, declared that dial-up access to the Internet is an interstate service. The order states:

- 1

Although the Commission has recognized that enhanced service providers (ESPs), including ISPs, use interstate access services, since 1983 it has exempted ESPs from the payment of certain access charges. Pursuant to this exemption, ESPs are treated as end users for purposes of assessing access charges, and the Commission permits ESPs to purchase their links to the public switched telephone network (PSTN) through intrastate business tariffs rather than through interstate access tariffs. ? In addition, incumbent LEC expenses and revenue associated with IST-bound traffic traditionally have been characterized as intrastate for separations purposes. ? Thus, the Commission continues to discharge its interstate regulatory obligations by treating ISP-bound traffic as though it were local.

The FCC's decision to treat the minutes associated with interstate dial-up Internet service as intrastate, when such services are ordered under an intrastate tariff, would under current rules assign relatively more costs to the intrastate jurisdiction. The State Members of the Joint Board used the cost study tool to estimate the relative magnitude of the costs that would have been allocated to the interstate jurisdiction if the FCC's finding that Internet traffic is interstate had been accompanied by a conclusion that Internet minutes should be counted as interstate for separations purposes.

The study allows entry of the percentage of intrastate minutes attributable to Internet usage and then reassigns that usage to the interstate jurisdiction. Separate adjustment factors are available for Subscriber Line Usage (SLU), Dial Equipment Minutes (DEM), Exchange Trunk Minutes of Use (MOU), Host/Remote MOU per Kilometer (Km), Conversation MOU and Conversation MOU Km factor.

For purposes of developing an initial estimate, the State Members estimated that 20% of the total intrastate local switching minutes are associated with dial-up Internet services. Since not all of the local switching minutes associated with dial-up Internet necessarily use trunks, it is possible that at least some of the dial-up Internet traffic will only be switched within the ISP's local switch. Therefore, we allocated 15% of the total intrastate usage for message trunks to the interstate jurisdiction. Similarly, not all of the dial-up Internet trunking usage would be routed to a tandem switch. We assumed that 10% of the intrastate tandem minutes would be reallocated as interstate. Finally, we allocated 20% of the intrastate Host/Remote MOU Km, 2% of the intrastate Conversation MOU and 2% of the intrastate Conversation MOU Km to the interstate jurisdiction. These numbers are averages and will not necessarily apply to individual companies or individual states.

Using these assumptions, and compared to the base case revenue requirement calculation, it appears that the effect of moving Internet minutes to the interstate jurisdiction would be a shift in costs of about \$2.8 billion annually nationwide (about \$1.40 per line per month) to the interstate jurisdiction.

#### GTE ADSL Tariff Order

Currently, Part 36 rules categorize loop investment into three categories: intrastate private line, interstate private line, and joint message. Private line costs associated with the loop are directly
